

About

TaiSol

TaiSol Electronics Co., Ltd founded 1994 in Taiwan

The company started by focusing on connector solutions for the computer and electronics industry. To meet market demands, TaiSol established PC Card Connector manufacturing facilities in Taiwan.

In 1997, added Thermal Coolers solutions to its product line. In 2001, Connector and Cable manufacturing plant launched in Dong Guan, China. In 2002, Heat pipe and Module manufacturing plant launched in Suzhou, China. Over the years, TaiSol has steadily grown and expanded both in size and in product areas.

TaiSol Electronics are expertise in designs and manufactures electronics thermal cooling and flash media connector solutions. We had supplied over millions of cable assemblies worldwide. While reducing production costs, TaiSol has not sacrificed innovation and quality.

TaiSol has a family of flash media connectors to offer: PCMCIA, CF, MS, SD, SM, etc. Our patented 4-in-1 connector is a milestone of the media connector industry. We continue to increase to our family of flash media connectors with new products. TaiSol has a wide customer base and continues to have success working with Tier-1 MNCs.

As part of our commitment to quality, TaiSol factories maintained ISO9001:2000 certification and has continued to advance its design and production capabilities.

TaiSol is capable of meeting the challenges presented by the computer and electronic industries. In addition to our standard product lines, TaiSol specializes in designing customized solutions for our customers.

Today, TaiSol has established itself as one of the leaders in the thermal solutions, connectors and cable businesses. With headquarter in Taiwan and branch offices in China, Singapore, Japan, USA and worldwide distribution, TaiSol is establishing its global presence. Armed with our dedicated employees and our successful product lines, TaiSol is officially listed for IPO in Taiwan stock market.
